

WHY SHOULD YOU CHANGE YOUR OIL TANK?

Underground oil tanks do not last forever. An unused or untreated tank can be a serious problem. It can rust while containing fuel, sediment, sludge or oily water which can leak into the ground and cause severe contamination.

Most oil tanks are well past their life expectancy of between 20 and 25 years. Without proper maintenance by professional tank specialists like **Advanced Environmental**, many leaks can go undetected for years; causing not only the deterioration of your property's value, but damage to the environment as well. It is important to protect your investment and your drinking water by removing your aging tank sooner rather than later and replacing it with a brand new guaranteed oil tank from **Advanced Environmental**.

The knowledgeable and courteous professionals at **Advanced Environmental** are committed to your satisfaction, the comfort of your family and the protection of our environment.

Advanced Environmental is a family owned and operated business, which means the owner is available to you through all phases of the job.

At no cost to you, an expertise preliminary site assessment will be performed, and a written proposal delivered, so that you can fully understand the scope of your project before you decide to proceed with **Advanced Environmental**.

Advanced Environmental utilizes state-of-the-art equipment in conjunction with the latest techniques and methods to ensure that your project is completed swiftly and safely.

Providing you with the highest quality materials that meet the exact specifications of your application and our exacting standards, **Advanced Environmental** stridently adheres to all government regulations and industry guidelines.

Advanced Environmental:

Safely servicing america's oil tanks.

Advanced Environmental specializes in the remediation of contaminated soil and water for any leaking oil tank for all residential and commercial sites. We also specialize in the removal, installation and abandonment of underground and above-ground oil tanks.

As experts in the field of residential and commercial heating fuel and oil containment, **Advanced Environmental** will provide you with economical and environmentally friendly solutions for any fuel storage application.

The experienced staff at **Advanced Environmental** works closely with real estate agents, insurance professionals and government agencies in order to expedite your property transactions and guarantee compliance with all applicable codes and regulations.

Interacting directly with your local municipality and inspectors, **Advanced Environmental** manages the procurement of requisite permits as well as coordinates the scheduling of any town inspections and necessary approval processes.

Advanced Environmental is licensed by the United States Environmental Protection Agency (US-EPA) and the New York State Department of Environmental Conservation (NYS-DEC).

Carrying full general and pollution liability insurance, all work performed by **Advanced Environmental** is completely covered and guaranteed for your protection and that of your family.

To speak with a tank specialist at **Advanced Environmental** regarding your oil tank, call **914.761.8020** today; or visit us on the internet at www.thetankspecialists.com.

From the procurement of building permits to the scheduling of municipality inspections, the tank specialists at **Advanced Environmental** will coordinate every aspect of your project and expertly perform all engineering work; complying with all federal, state, county and local guidelines.

Oil Tank Removal and Installation

After excavating to uncover your tank, **Advanced Environmental** will vacuum the remaining product and safely dispose of any wastes and the tank unit at licensed disposal facilities. Once the installation of your new oil-tank and the replacement with clean dirt of the excavated site is complete, **Advanced Environmental** will issue you a formal Certificate of Completion.

Oil Tank Abandonment

The abandonment of an oil tank requires that the tank is filled with inert material such as sand, K-crete or foam. In accordance with all applicable local regulations, **Advanced Environmental** will make sure that your tank is abandoned in an economical and environmentally responsible fashion. **Advanced Environmental** will issue you a formal Certificate of Completion.

Contaminated Soil and Water Remediation

Advanced Environmental will work closely with your insurance carrier to get your cleanup covered! Before remediation can begin, **Advanced Environmental** will thoroughly inspect your site for evidence of leakage or contamination and will send samples of your soil to an accredited laboratory for testing. All contaminants will be safely excavated and disposed of at a licensed facility. For your protection, all remediation projects performed by **Advanced Environmental** adhere to the guidelines of the New York State Department of Environmental Conservation (NYS-DEC); are assigned Spill Numbers and have Site Closure Reports filed upon completion of the project. **Advanced Environmental** will issue you a formal Certificate of Completion.
